

EASTBAOYU
NEW ENERGY

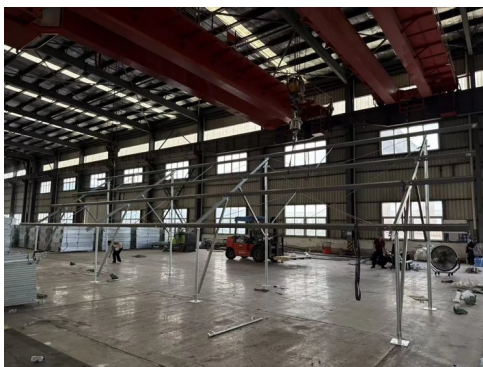

Company & Entity Fact Sheet

A controlled public identity, product-scope and supplier-onboarding reference

DOCUMENT CODE	EBY-PUB-ENTITY-001	VERSION	1.0
ISSUE DATE	2026-07-20	CLASS	Public reference
PUBLISHER	East Baoyu (Tianjin) New Energy Technology Co., Ltd	LANGUAGE	English

Purpose

Give buyers a single, downloadable summary of the website brand, operator record, group relationship, public contact route, product scope and the documents that control a transaction.

Controlled boundary

This document summarizes website-published information. It is not a quotation, contract, certificate, structural calculation, approved drawing, inspection result or warranty. Confirm the applicable entity, product configuration and document revision for each order.

IDENTITY AND RESPONSIBILITY

One public map - several order-specific roles

The East Baoyu name identifies the website brand. The legal entity responsible for selling, exporting, manufacturing or warranty service must be confirmed in the applicable commercial and project documents; those roles should not be inferred from the brand or group name alone.

Role	Website-published position	Controlling evidence
Website brand	East Baoyu New Energy	Website and approved brand material
Website operator record	East Baoyu (Tianjin) New Energy Technology Co., Ltd	Legal & Entity page and Privacy Policy; registration details should be checked before formal reliance
Parent group	Baolai Steel Group	Corporate ownership or group documents; the group name is not automatically the seller or warranty provider
Manufacturer	Confirmed for the selected product and production route	Quotation, approved drawing, ITP, factory and quality documents
Seller / contracting party	Project-specific	Signed quotation and contract
Exporter of record	Shipment-specific	Commercial invoice, packing list and customs documents
Warranty provider	Product- and contract-specific	Signed warranty terms naming provider, scope, start point and exclusions

Catalog name difference

Some current public catalogs use Tianjin Dongfang Baoyu New Energy Co., Ltd or Dongfang Baoyu New Energy. This fact sheet does not declare those names interchangeable with the website operator. Match the current quotation, contract and corporate documents before onboarding or payment.

PUBLIC CONTACT ROUTE

Contact and correspondence

Channel	Published detail	Use
Website	https://eastbaoyu.com/	Product, project, evidence and policy information
Corporate email	info@eastbaoyu.com	Website, project, document and correction inquiries
Telephone	+86-22-28352066	Public Tianjin contact route
Correspondence address	A-1005 Fenghui Plaza, 103 Weidi Street, Hexi District, Tianjin, China	Published correspondence address; do not treat as a registered address without checking the corporate record

**PRODUCT SCOPE**

Public product-family coverage

The website publishes five controlled product-family records. They define inquiry and selection routes, not universal approved models or capacities.

Family	What the public record covers	Project release boundary
Ground screw and helical foundations	Steel foundation routes for axial, lateral and moment demands	Site investigation, loads, installation, interfaces, corrosion and project standards
Fixed PV mounting	Ground, roof, carport and other defined fixed-array interfaces	Layout, module, wind/snow/seismic loads, foundation or roof capacity, material and coating
Solar tracking systems	Tracking structure and controls interfaces	Wind basis, stow strategy, drive and sensor architecture, foundations, availability and operating responsibility
Flexible PV mounting	Cable or flexible-member systems for defined spans and geometry	Nonlinear/dynamic review, sag, pretension, anchors, erection and measurement procedure
Custom steel structures	Project-specific buildings, bridges, power and industrial steelwork	Approved calculations, drawings, member/connection schedules, fabrication, coating, logistics and erection interfaces

BUYER ONBOARDING

Documents to match before approval

- Confirm the proposed contracting entity, seller and payment beneficiary from current corporate and commercial documents.
- Confirm the manufacturing entity and site for the selected product and production route.
- Request current certificates by holder, address, scope, issuer, number, dates and relevant annexes.
- Agree the product configuration, governing standards, approved drawings and responsibility matrix.
- Agree the inspection and document schedule, including material, welding, NDT, coating, dimensional, release and packing records where applicable.
- Confirm exporter of record, Incoterm, packing, destination and shipment documentation.
- Read the signed warranty terms for provider, covered product, start point, environment, maintenance, remedies and exclusions.

Secure document route

Do not submit confidential, export-controlled, personal or proprietary drawings through the public form. Contact East Baoyu first to agree an NDA and secure transfer method where required.
